Year 1 – Summer 1
The African Savannah

GEOGRAPHY
Year 1

Focus Question: What is the savannah like, and how do people and animals live there?

Key Vocabulary

Continent	one of Earth's seven main land areas
Equator	imaginary line around the middle of Earth
Climate	usual weather over many years
Savannah	grassland with scattered trees
Habitat	a place where living things live
Conservation	looking after nature
National park	land set aside for protection

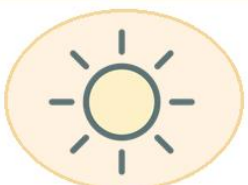
Key Learning

- There are seven continents; Kenya is in Africa.
- Kenya is in East Africa near the Equator.
- Climate is the usual weather over many years.
- A savannah has tropical grassland, trees, and wet and dry seasons.
- Human and physical features are found in the savannah.

Geography in Action

Our world

Seven continents and large oceans.



Africa and Kenya

Kenya is near the Equator.

Savannah habitat

Grasslands support people and wildlife.

Remember and Try

- Locate Africa and Kenya on a world map.
- Identify animals and habitats in a savannah.
- Explain why wildlife needs protecting.

End Point

I can locate Kenya, describe its savannah climate and features, and explain why habitats should be protected.
