Europe

GEOGRAPHY
Year 6

Focus Question: What are the contrasting features of European countries?

Key Vocabulary

Continent	one of Earth's main land regions
Physical geography	the natural features of a place
Human geography	features and activities of people
Agriculture	farming crops and animals
Land use	how people use an area of land
Trade	buying and selling goods and services
Climate	usual weather patterns over many years

Key Learning

- Europe has many countries, capitals and surrounding seas.
- The Alps and Pyrenees are mountains; the Rhine and Danube are rivers.
- Capitals include Paris, Berlin, Madrid and Rome.
- Latitude, altitude and the sea affect European climates.
- Climate and landforms influence farming and land use.

Geography in Action

Europe map

Countries, capitals, rivers and seas.

Contrasts

Regional climates and farming differ.

City study

Compare Bristol and Berlin.

Remember and Try

- Locate major European features on a map.
- Compare climates and land use.
- Compare Bristol and Berlin with evidence.

End Point

I can locate European features, explain regional climate differences and compare land use in Bristol and Berlin.
